

My Report

Why R Markdown is Awesome

Hugh Mann

04/08/2019

My First Report

I'm using R Markdown for the first time, and I'm writing my own report!

Including code

Parabola code

Look at all the cool code I can include in R Markdown!

```
text <- "R Markdown is cool"
print(text)
```

```
## [1] "R Markdown is cool"
```

```
x = seq(-5,5,0.1)
y = x^2
plot(x,y)
```

How much I love using R Markdown

Loads! R Markdown is such a versatile format that I can make pretty much any document I want. I use it for all my reports, I use it to present my graphs, I even use it to make slideshow presentations. Yes sir, R Markdown is the only report generating software I use anymore!

Main Heading

Sub-sub-sub-heading

Sub-sub-sub-sub-heading Sub-sub-sub-sub-sub-heading

Regular font!

R Markdown

Why is it so cool?

Because it can produce a huge variety of amazing documents!

Is there anything cooler?

No!

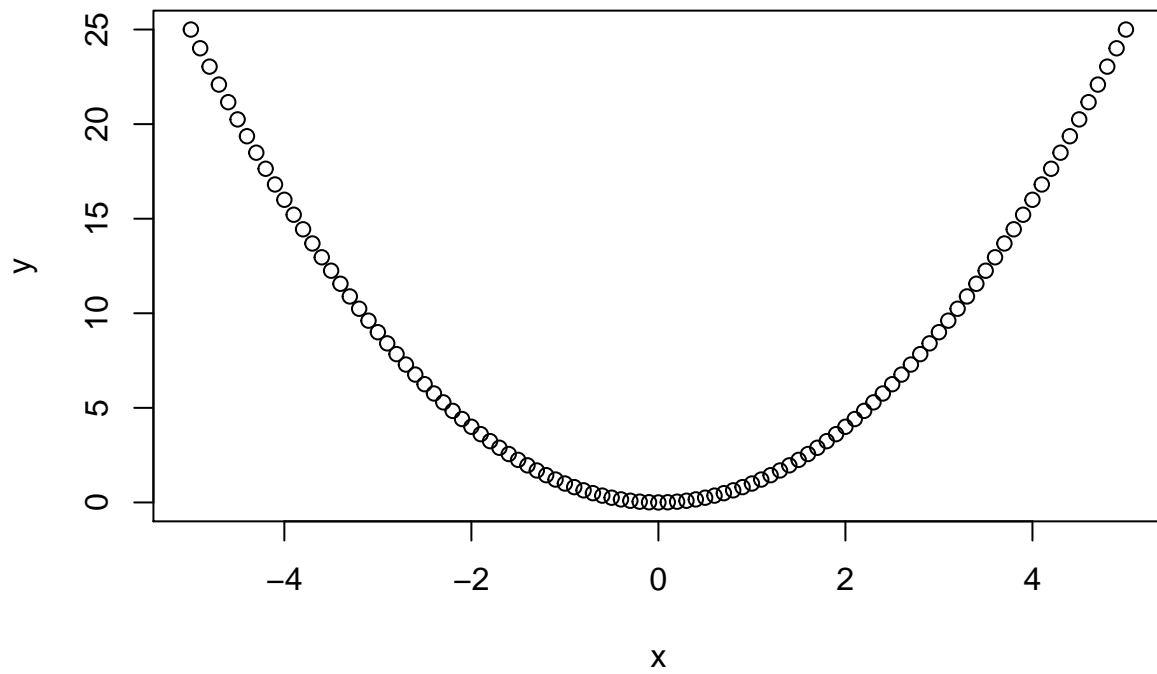

Figure 1: A nice parabola!

R Markdown text options

Bold text

Also bold text

Italicised text

~~Strikethrough~~

Super^{script}

`Code font`

- Bullet point 1
- Bullet point 2
- Bullet point 3
 - Sub-bullet (a)
 - Sub-bullet (b)

1. Numbered list 1
2. Numbered list 2
3. Numbered list 3

****Not bold text****

Not italicised text

Other Languages

```
<div class="row">
  <div class="col-md-6">
    Hello
  </div>
  <div class="col-md-6">
    World!
  </div>
</div>
```

```
\usepackage{my_package}
% latex
```

```
# Example Heading
```

Here is an example of some text I could put in R Markdown. My ****italics**** and ***bold*** won't display in a
